

Approach to Lean Manufacturing

Detroit, MI

24 October 2007

1:00PM to 5:00PM

Seminar Description:

“Lean” It’s today’s manufacturing buzzword – one that is being rapidly adopted by many other industries. But do you really understand what it is or what it means? We do! We are JMAC America, and we created many of the tools that comprise lean, such as Kaizen, TPM, JIT, SMED, and 5S. Most importantly, though, we know that the lean philosophy must be properly applied and work with the existing corporate culture **at the same time it is changing that culture**. The results when properly implemented? Phenomenal improvements in quality, cost, delivery, and customer service. But to achieve those results, top management must be the first to adopt lean tenets and be untiring in pushing toward a vision which they not only create but continuously champion. If you’re interested, this seminar will help you get there!

This seminar will help you:

- Understand the Origins of Lean Activity
- Understand the Lean Philosophy
- Learn Various Lean Techniques and Their Interrelations
- Understand the Sequence of Implementing Lean in a Manufacturing Environment.
- Appreciate Common Mistakes in Lean Implementation Efforts

Who should attend?

Vice Presidents of Manufacturing / Operations, Plant Managers

Cost :

\$150 per Person, includes a 1 hour social hour.

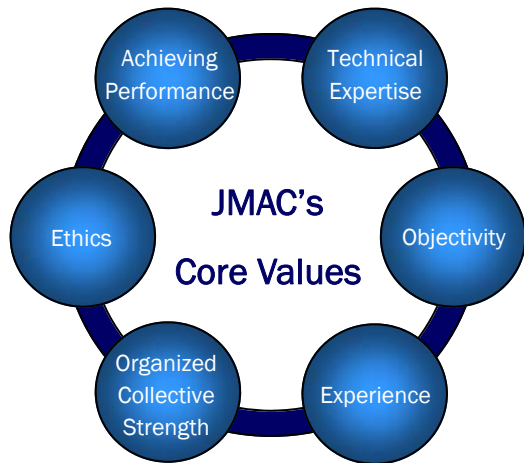

JMA Consultants America, Inc.

25 Northwest Point Blvd., Ste 740

About JMAC America:

JMAC was established in 1942 as the nucleus of the Japan Management Association (JMA) Group.

JMAC was a driving force in the dissemination of Deming's ideas both inside Japan as well as in many other countries, and it originated hundreds of Kaizen and Lean Manufacturing tools to assist Japanese companies in the improvement of productivity and quality. JMAC is Japan's oldest, largest and most prestigious management consulting firm.

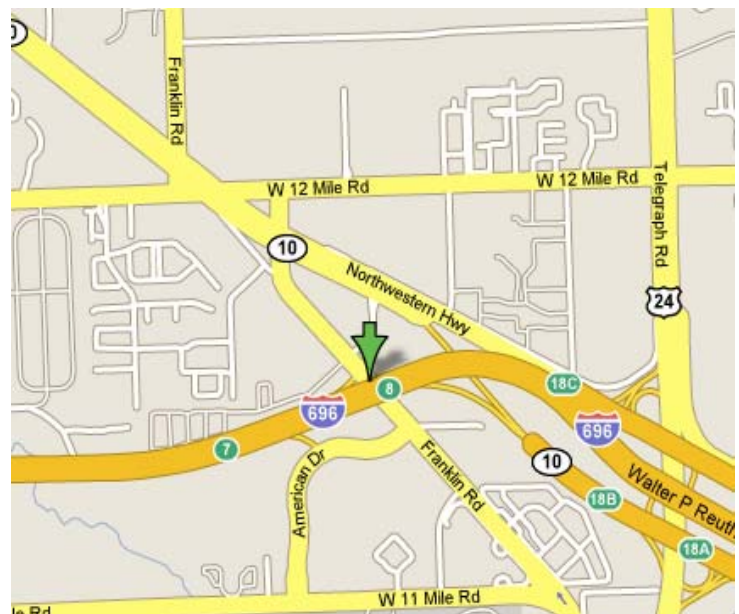

Over the past 30 years, JMAC has expanded its consulting operations worldwide. Starting in 1990, Japanese subsidiaries in the USA began to request the expertise of JMAC consultants in their American facilities. This trend led to the establishment of JMAC America in 1995. JMAC America, Inc. has continued to assist Japanese subsidiaries while simultaneously completing successful consulting projects for dozens of American companies.
